### Assembly Information

- The aluminum profile can be installed using the mounting brackets or fitted directly using countersunk screws;
- The advantage of using mounting brackets is the LED flex can be fitted into the aluminum profile before locating into the mounting brackets;
- The aluminum profile can be cut to size and butted together;
- Prior to installation clean the inner surface of the aluminum profile thoroughly with a spirit cleaner, this ensures a good bond with the flex;
- When fitting the feed connectors avoid excessive pressure;
- As with all LED flex avoid sharp bends and static.

## Data Sheet-Aluminum Profile

New aluminum track from EKLART to be used with light flex or other LED modules. The track works as an excellent heat sink, providing optimum cooling of LED modules for long life and high reliability. Some tracks have covers included in the price. There is a choice of covers (clear, frosted or milky) plus mounting brackets and end caps for easy mounting and installation of LED modules. The tracks can be shortened to the desired length.
